

Our Company at a glance

Coast 2 Coast Building Control Ltd was established in 2010 with the aim of providing an alternative to local authority Building Control anywhere in England and Wales. We are able to deal with any type of building work from small domestic extensions through to large commercial building schemes.

We are licenced by and subject to statutory regulation and monitoring by the Construction Industry Council (CIC) www.cic.org.uk.

We have been rigorously vetted and examined for technical competence, qualifications and procedures before being licensed to operate by the Government's national regulatory body and ISO9001.

Our operating procedures are independently audited under ISO9001 every 12 months.

Our competence is also independently checked every five years by the Construction Industry Council.

Our aim is to guide and assist our clients through the Building Regulation Approval process to ensure a successful completion of their project.

We have in place £5 million Professional Indemnity and £2 Million Public Liability Insurances as required by Government.

Our Services

Building Control

- Preliminary Assessment of the design
- Submission of notice to Local Authority
- Full plan check
- Consultations with statutory authorities such as the fire brigade
- Site inspections covering the building program
- Certification to show compliance has been achieved

Building Control Advisor

The Building Control Advisor (BCA) is appointed by the Contractor to carry out an independent third-party inspection and certification process on MOJ & Crown premises to ensure compliance with the Crown fire safety design guides.

This individual must be suitably qualified and experienced in Building Control and currently working as a Building Control Practitioner. Coast 2 Coast Building Control can act as your BCA.

Fire & Safety Consultancy

Coast 2 Coast takes fire safety seriously and understand the complexities within this aspect of the Building Regulations for both the commercial and residential builds. We therefore provide a service where you can approach us at an early stage to give an overview of the design before it is submitted to planning.

At an early stage we can give advice on whether extra features should be provided that could affect planning and design issues for the client.

There are many occasions where the current guidance given to help with compliance is not sufficient to achieve the type of design you wish to achieve. At this early stage we can advise if you need a fire engineer to aid you with your design, whom we can work closely with to ensure that both us and the fire brigade will be satisfied as well as your needs.

Accessibility

The world we live in is becoming more diverse. Technology today is making life better for people who have a wide variety of disabilities, enabling them to work, socialise and become increasingly independent.

It is important that developers and designers keep up these changes by creating building with greater accessibilities enabling people to do the everyday things we take for granted.

There are many types of disabilities to cater for and within each disabilities there are many variants, thus making design more challenging. Coast 2 Coast have surveyors who can advise on the legislation and help you move forward using all the latest guidance and knowledge.

The approved document M accepts that it cannot give advice on all types of buildings eg leisure centres and sports venues. Extra thought and care needs to be taken to ensure these buildings are accessible.

It is acknowledged that with existing buildings there can be many restraints. It is always good practice to employ experts to help create an access strategy. This will not only assist the designer, but also enable to end user to have better understanding on how treat all people.

Plan Risk Analysis

Plan checking is part of the process to seek approval under the Building Regulations. For larger and/or complex designs plan checking after planning and just before works are due to commence could be costly if an issue is raised causing a design change, especially if costs have to be re-adjusted after initially being agreed.

From past experiences and ever increasing demand form clients for flexible designs, Coast 2 Coast have found that fire safety, accessibility, and thermal energy are the common areas where problems can be found and can be costly to rectify. Making late alterations often result in a disappointed client who not only ends up with a design they didn't quite want, but also ends up paying a higher price for the re-design and construction.

Energy Resourcefulness

The environment around us is changing and it is our responsibility to ensure that good design and construction methods achieve buildings that:-

- Have a reduction of heat loss CO2emissions
- Are efficient to use throughout their lifespan
- Are constructed using materials more friendly to the environment
- Are constructed using a method that does not harm the environment

It is important that developers are introduced to as many methods and designs that meet the above requirements.

Coast 2 Coast work alongside experts who can advise on the best way forward to not only comply with the Building Regulations, but go beyond and create buildings that will be able to withstand changes that are occurring within our environment.

Organisation Chart

Steven D Thomas MCABE

Director

Qualifications

Member of the Chartered Association of Building Engineers

Education

Higher National Certificate (HNC) Building Studies - Bridgend Technical College Ordinary
National Diploma (OND) Building Studies - Bridgend Technical College.

Business History

I started my career in 1986 with the Vale of Glamorgan Council as a Trainee Building Control Officer soon after joining Port Talbot Borough Council in 1989 as a Technician.

In 1991 I became a Building Control Officer for Bridgend County Council over seeing work in the area of the Borough and further developing my client skills, in 1989 a year after private companies were permitted to operate in the field of Building Control I joined Tarmac Professional Services as a Building Control Surveyor, which soon changed its name to Carillion Specialist Services as its known today.

While at Carillion I developed a keen interest in high-end residential care premises of which I still specialist in today.

In 2004 I co-founded Celtech Consultancy Limited and in 2010 founded Coast 2 Coast Building Control Limited with my business partner Neil Walton.

I am currently overseeing a number of large residential care premises across the UK.

I am a customer focused individual

Neil David Walton IFSM C Build E MCABE
Director

Qualifications

Member of the Institute of Fire Safety Managers
Member of the Chartered Association of Building Engineers

Education

Institute of Building Control Part III
Diploma in Building Surveying (Building Control)
Higher National Certificate
BTec National Certificate

Business History

I started my career in 1985 as a student Building Control Surveyor after completing an apprenticeship as a carpenter and joiner.

I became a member of the institute of Building Control in the late 1980's (now merged with the RICS) and obtained a Diploma in Building Surveying (Building Control)

After completing 12 years with local authority, I left the public sector and joined Carillion Specialist Services Welsh office, during my 7 years there I was responsible for the largest single construction project in Europe at that time and saw from beginning to end the three-year, £600 million, GCHQ contract. I can therefore appreciate the conflicts of security and means of escape.

I was also responsible for the redevelopment of Butlins Minehead Skyline Pavilion and surrounding retail buildings

In 2004 I left Carillion, and co- founded Celtech Consultancy an independent approved inspector which doubled its surveyor base by the time I left in 2010 to form Coast 2 Coast Building Control with my business partner Steve Thomas.

My expertise lies in all aspects of Building Control, but I particularly specialises in the Retail and the Hotel sectors, having overseen a number of large hotel developments.

I enjoy working on historic buildings and appreciates the old ways of building and am respectful of the effects of today's legislation has on these buildings.

Ian Lawrence MCABE, MCIQB
Senior Building Control Surveyor

Qualifications

Member of the Charter Institute of Builders
Member of the Chartered Association of Building Engineers

Education

University of Greenwich (Design and Construction Management BscHons)
BTec ONC Civil Engineering
BTec First Certificate in construction

Business History

Ian started his career as a trainee draughtsman for a civil engineering practice and worked on many bridge projects around the world including the links to Hong Kong airport to the Severn Suspension Bridge as well as working on the refurbishment of the National Theatre.

During this time Ian studied part time for 8 years and gained a degree in Design and Construction Management and went on to become a chartered member of the Chartered Institute of Builders and is a Chartered member of the association of Building Engineers.

Ian worked for Westminster Council in Building Control and worked on many projects in the commercial sector including the refurbishments of theatres and hotels a 9-storey mixed used Sainsbury's building and general office refurbishments.

From Westminster Ian worked for Sevenoaks District Council where he gained experience in many types of domestic buildings from small to large scale projects and housing estates. From this Ian went to work with Greenwich council and worked on the O2 project as well as schools and new high-rise flats.

Ian has also worked as a civil servant for the Central Government as a technical advisor and overlooked appeals and policies mainly on disabled access as well as assisting with other parts of the Building Regulations. During this time Ian also sat on the committee for the revision of BS8300 and chaired a sub committee and was involved in production of the new document to aid disabled access to all types of domestic dwellings in DD266 – Accessible homes

Ian joined Coast 2 Coast Building Control in 2014 where he has been responsible for helping to set up and market the offices in Kent and went on to setup and start the management of their new London Office.

With Ian's varied background he understands the design process as well as the Regulatory aspect of building design along with the construction process and therefore is always on hand to find solutions to any potential problems that may arise.

Ian prides himself on working as a team with his clients and being open minded to finding solutions.

Tukkan Dikkez
Senior Site Surveyor

Qualifications

Member of the Chartered Institute of Building (MCIOB)
Member of Chartered Association of Building Engineers (MCABE)

Education

BSc(Hons) Design & Construction Management
BTec Building Construction – National Certificate
BTec Building Construction

Business History

Tuk has over 20 years of project management, surveying, construction, contract administration and design experience, working on medium to larger contracts.

His construction career started in 1989 as Surveyor for Building Services and Estates Department for University of Greenwich in 2001 he became a project manager for Taylor Woodrow.

In 2003 he ran his own business which over saw refurbishment contracts.

In 2005 he became the contracts manager for City West Homes and in 2011 was the Property Manager for Chapter 1 Charity Limited.

In 2015 he took a change in my career and started to specialize as a Senior Site Inspector for Coast 2 Coast Building Control, honing his skills into the unique Building Control function.

He is ambitious, with drive and initiative, self motivated, organised, a sense of judgement and common sense and has outstanding customer service skills.

Marcel Hurst BSc. MRICS, MICOB MASI
Senior Building Control Surveyor

Qualifications

Member of the Royal Institute of Chartered Surveyors

Member of the Charter Institute of Builders

BSc. In Building Surveying

Fire safety specialist competence validation certificate in association with the institute of fire engineers.

Education

Business History

Marcel is a professionally qualified Chartered Building Surveyor with over 30 years' experience in Building Control.

Currently his time is split between Coast 2 Coast Building Control as a Senior Building Control Surveyor assisting the London Office with site inspections and plan assessment duties in the growing residential and commercial sectors and the Royal Borough of Greenwich as Major Projects Surveyor and more recently Group Area Manager.

Presently as well as being involved with mixed use schemes for Coast 2 Coast Building Control, He is also managing a 20 year re-generation plan in the Greenwich peninsular, including on-site inspections and co-ordinating design meeting and evaluating fire and building regulation design.

Recently he has passed the fire safety specialist competence validation certificate in association with the institute of fire engineers.

Ieuan Kingston BSc (Hons) MCIOB, C. Build E, MCABE
Senior Building Control Surveyor

Qualifications

Member of the Chartered Association of Building Engineers
Member of the Chartered Institute of Building
2:1 Honours Degree in Building Surveying

Education

University of Glamorgan
Building Surveying Degree
Ystrad Mynach Technical College
Ordinary National Diploma (OND) Construction
City & Guilds in Auto CAD

Business History

Ieuan is a professionally qualified Chartered Building Surveyor with specialist experience in Building Control.

He joined Coast 2 Coast Building Control in 2019, but prior to this role was a Senior Building Control Surveyor with another Approved Inspector for 12 years.
He started his career as a Building Control Surveyor with Newport City Council.

Over his professional career he has gained a wealth of experience in both commercial and domestic sectors, with a client base that includes several specialist loft conversion companies who operate predominantly in Southeast Wales, but he thrives in dealing with specialist residential care homes.

Francis Mullin
Building Control Surveyor
